

Worked example - pricing claim - Spot AI claim risk at work

Promise: Spot when an AI answer is overconfident or unsupported before you act on it at work.

Worked example - pricing claim

- ☐ AI draft: "The new pricing is already approved and risk-free for all teams, so we can roll it out Monday."
- ☐ Claim: pricing is approved and risk-free for all teams.
- ☐ Evidence gap: no owner, no approval trail, "risk-free" is absolute.
- ☐ Owner to check: pricing owner or commercial lead.
- ☐ Trust call: verify first (do not send as fact).
- ☐ Next check: confirm approval status and which teams are in scope.
- ☐ Expert call: Use with a check - confidence is not clearance.
